#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/23/2007 has been entered.

### ***Allowable Subject Matter***

2. Claims 1,3-10,12,19-21,34,37,40 are allowed.

The following is an examiner's statement of reasons for indicating allowable subject matter: regarding claims 1,3-10,19-21,37,40, the prior art of record does not disclose the claim limitations in combination with a guide device along said handling line and disposed only on one side of said handling line.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 38,39 have been considered but are moot in view of the new ground(s) of rejection.

Applicant argues Koga does not serve for surface treatment of workpieces. In response, the device of Koga is fully capable of being used for surface treatment of workpieces.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 38,39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koga USP 5,088,176 in view of Goebel WO 02/04279 A1.

Koga discloses a device comprising:

- A first module having a handling line with one or more handling regions and a guide device (fig.1) (C1/L10-16)
- One or more carriages (fig.1)
- Wherein said carriages pivot about an axis (axis of rotation of workpiece 1 by way of elements 5 and 11) extending substantially parallel to a direction of movement of the workpieces along the handling line and additionally pivot about an axis (axis of element 4) extending substantially perpendicular to the direction of movement of the workpieces along the handling line and additionally (fig.1)

Koga does not expressly disclose a second module wherein said first module is structured and arranged to cooperate and be combined with various types of said second module.

Goebel teaches a second module wherein said first module is structured and arranged to cooperate and be combined with various types of said second module (fig.1) for the purpose of providing multiple production sections in a production line (abstract).

At the time of invention it would have been obvious to one having ordinary skill in the art to employ a second module wherein said first module is structured and arranged to cooperate and be combined with various types of said second module, as taught by Goebel, in the device of Koga, for the purpose of providing multiple production sections in a production line.
